

VANSHITA GUPTA

+91 7772071025 | Pune, Maharashtra, India | vanshitagupta906@gmail.com | LinkedIn | GitHub | Portfolio

CAREER OBJECTIVE

Computer Science graduate with hands-on experience in software engineering with full-stack web application development using React.js, Node.js, JavaScript, TypeScript, HTML5, CSS3, MySQL, and MongoDB, with exposure to REST APIs, cloud deployment, DevOps fundamentals, open-source LLM integration, AI-assisted software development, and cloud deployment. Strong foundation in Computer Science fundamentals, Object-Oriented Programming (OOP), Data Structures & Algorithms, software testing, debugging, REST APIs, Agile/Scrum, and problem solving.

INTERNSHIP EXPERIENCE

Full Stack Developer Intern – Stackmentalist Ventures Pvt. Ltd.

Apr 2026 – Present | Pune

- Designed, developed, tested, maintained, and optimized scalable React.js and Node.js web applications with secure authentication, REST APIs, and optimized backend services.
- Built reusable software components, implemented JWT authentication, and developed clean, maintainable, reliable, and well-documented code following software engineering best practices.
- Integrated the open-source DeepSeek V4 model using Flask APIs for AI-powered features,, gaining hands-on exposure to AI integration, prompt engineering, and API development.

MERN Stack Intern – Mankind Pharma Ltd.

May 2025 – Jul 2025

- Developed responsive React.js user interfaces and integrated REST APIs using Node.js, Express.js, MongoDB, JavaScript, and MySQL.
- Optimized MongoDB queries and implemented JWT authentication, improving application response time by 40%.
- Collaborated with developers through Git, participated in code reviews, testing, debugging, and deployment while delivering reliable software features.

Frontend Development Intern – Cognifyz Technologies

Jun 2024 – Aug 2024

- Developed responsive HTML5, CSS3, and React.js UI components and integrated REST APIs for web applications.
- Debugged frontend issues, optimized rendering performance by **25%**, and supported software testing activities.
- Collaborated with team members using Git to deliver maintainable software solutions.

EDUCATION

Sage University, Indore

B.Tech, Computer Science & Engineering

CGPA: 8.45

2026

ACHIEVEMENTS & CERTIFICATIONS

Programming in Java – IIT Kharagpur (NPTEL)

Full Stack Web Development – Google (Udemy)

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), TypeScript, Python (Basic), HTML5, CSS3

Frameworks: React.js, Redux, Next.js, Node.js, Express.js,), Flask, NestJS, Bootstrap, Tailwind CSS

Databases: MySQL, MongoDB, SQL

Tools: Git, GitHub, Postman, Docker (Basic), DeepSeek V4, OpenAI APIs, Vite, AWS (Basic), Vercel, Render

Core: Software Engineering, Software Development, Object-Oriented Programming (OOP), SDLC, Software Testing, Unit Testing, Debugging, Agile/Scrum, Jira (Basic), DevOps Fundamentals, REST APIs, Data Structures & Algorithms, Problem Solving

PROJECTS

Stay Go

[Live Demo](#)

- Developed a full-stack web application using React.js, Node.js, Express.js, MongoDB, REST APIs, JWT authentication, and Google Maps API.
- Deployed on Vercel and Render, optimized performance, tested features, and resolved production issues.

Review Hub

[Live Demo](#)

- Built a full-stack company review platform with authentication, REST APIs, search, filtering, ratings, and reviews.
- Integrated DeepSeek V4 with Flask for AI-powered review assistance and prompt engineering.
